

Lonnex *Njenga*

FULL - STACK SOFTWARE DEVELOPER

CV / 2026

MOMBASA, KENYA

01 PROFILE

Full-stack developer who builds scalable, secure and pleasantly simple software, from offline-first business systems to AI-assisted learning tools. Graduating in Information Technology this November, with hands-on industry attachment and real client work behind me. Currently going deeper into Python, machine learning and RAG applications.

02 EXPERIENCE

Agent

PRESENT

TIJAARA ISLAMIC MICROFINANCE

- Serve clients as an agent for an Islamic microfinance institution, alongside software work.

Freelance Software Developer

PRESENT

SELF-EMPLOYED · MOMBASA

- Design and build web applications end to end, from database and API to deployment.
- Delivered the company website for Lyn Logistics Services, a Mombasa-based logistics business.
- Ship own products in parallel: SmartKiosk, SyllabusAI and ClassFlow.

Industrial Attachment

5 MONTHS

SWAHILIBOX · MOMBASA

- Worked inside a professional IT team, applying classroom theory to live systems and real deadlines.

03 SELECTED PROJECTS

SmartKiosk

OFFLINE-FIRST POS

Point-of-sale and business management software for SMEs that keeps working without a connection.

SyllabusAI

AI · SAAS

Student-first SaaS that turns 70-page syllabi and long lectures into something you can actually study.

ClassFlow

PLANNER

Schedule planner for students to track timetables, monitor attendance and never miss a class.

E-Commerce Store

MERN

General-purpose online store built on the MERN stack.

JWT Secret Key Generator

TYPESCRIPT

Free tool for developers that generates random, cryptographically secure secret keys.

Lyn Logistics Services

CLIENT WORK

Company website for a Mombasa-based logistics business.
